

JIM VENTURINI - MOUNT PLEASANT VILLAGE BOARD TRUSTEE #6 (NP)

Key findings include:

- **Recently Appointed/Elected Board Trustee:** Venturini was appointed to his position in 2023 and then reelected in 2024 for the first time, running unopposed. The most newsworthy issues in Mount Pleasant have been around the redevelopment of the Foxconn land with a Foxconn datacenter.
- **Charlie Kirk Death Reaction:** Venturini shared posts to his Facebook reacting strongly to Charlie Kirk's death and sharing posts from an election denying conservative commentator.

Mount Pleasant is a village of roughly ~27.7k residents in Racine County, a Milwaukee–Chicago corridor suburb best known for the failed Foxconn development [[NBC Chicago](#), 9/24/2025] and, more recently, large Microsoft data-center investments on former Foxconn-assembled land [[CBS 58](#), 9/24/2025]. Trump took credit for bringing the Foxconn plant to Mount Pleasant initially [[NPR](#), 9/24/2025]. Median household income is around \$90k and the median age is ~45. Ongoing policy context includes the Village's historic infrastructure/TID build-out for Foxconn, a unanimous 2023 board approval of Microsoft's expansion, and continuing intergovernmental disputes over water service tied to the Foxconn footprint [[Census Reporter](#), [TMJ 4](#), 9/24/2025].

Politically, Mount Pleasant is extremely competitive. Across all Mount Pleasant ward groups, Donald Trump received carried Mount Pleasant 49.8-48.7 in 2020. Both Evers and Harris ran on similar margins in 2022 (50.29-49.71) and 2024 (50.79-49.21) respectively, losing Mount Pleasant by extremely narrow margins [[Racine County](#), 9/24/2025].

BACKGROUND

Venturini was appointed and sworn in as Trustee #6 on August 28, 2023. Prior campaigns: Before serving as trustee, Venturini ran for Racine Unified School District Board (District 6) in 2016; he advanced from the February primary and lost the April general to John Heckenlively [[Ballotpedia](#), 9/24/2025].

On the board, Venturini publicly backed Microsoft's data-center expansion, calling it "a big thing for the village" when the board unanimously approved the deal in November 2023—positioning him with the pro-growth majority that leveraged existing Foxconn-era infrastructure [[CBS 58](#), 9/24/2025].

Venturini is a long-time commercial insurance/risk-management advisor at David Insurance (a Vizance company), with industry certifications (AIS, AAI, CAWC) and prior small-business ownership in formalwear retail. Public bios and org charts place him in that role since 2009 [[The Org](#), 9/24/2025].

You remember election night, 2020?
 Trump was winning.
 Ballot counters were covering windows.
 Hunter's laptop vanished.
 Illegals were coached on how to vote.
 And still—DJT was up.
 Then at 4am, votes exploded like a glitch in the fucking Matrix.
 Now they're not just rigging ballots...
 They're rigging the math.

30 million illegals counted in the Census = More districts.

More electoral votes.

More power.

This isn't representation.
It's calculated dominance.

A society of strong men never would've put up with this shit.
That's exactly why they came after us first.

This is who they killed yesterday. Why?! 😞
 Let's not forget Charlie and what he did in his short time on this earth.

Charlie Kirk ✓
